

Food Product Development and Labeling Strategic Consulting

Specializing in FDA Regulatory Matters

EAS Consulting Group

A Certified Group Company

EAS Consulting Group, as part of the Certified Group of companies, merged with Food Safety Net Services, (FSNS), to become the global leader in testing and regulatory solutions for the FDA and USDA regulated industries.

EAS' network of nearly 200 independent advisors and consultants enables us to provide comprehensive consulting, training and auditing services, ensuring proactive regulatory and quality compliance for food, dietary supplements, pharmaceuticals, medical devices, cosmetics, tobacco, hemp and CBD. From regulatory strategy, auditing, training, FDA inspection preparation, 483 & Warning letter remediation, quality system implementation, labeling compliance, preparation of technical submissions, expert witness services and due diligence assessments, EAS offers the expert knowledge and experience your company requires. With our vast expertise in FDA's and USDA's policies and enforcement, EAS is the proven choice for assistance with product testing and other regulatory and quality consulting solutions.

The EAS strategic consulting service provides solutions to companies confronting the challenging issues of food product development. By taking a holistic approach that considers marketing objectives and the current regulatory, compliance, and enforcement environment at the federal, state and local levels, EAS assists clients from ideation through commercialization. Our international team of consultants can also assist US-based clients wishing to export.

Developing proactive solutions for:

- ✓ GMO Labeling
- ✓ "Natural" Foods and Claims
- ✓ Undefined Claims
- ✓ New Threats Posed by FDA Warning Letters
- ✓ FTC v. FDA
