

Services for CVM Regulated Industries

Specializing in FDA Regulatory Matters

EAS Consulting Group

A Certified Group Company

EAS is the proven choice for the FDA Center for Veterinary Medicine (CVM) regulated industries including animal feed, pet food and animal medications. Just as with products intended for human use, CVM oversees these products with the same scrutiny, with similar regulatory requirements, including GRAS, Food Additive Petitions, New Animal Drug Applications, Medicated Feed Mill Licenses, Preventive Controls for Animal Feed/Pet Food and more. In addition, State Feed Control Officials have a strong regulatory hand in enforcing the American Association of Feed Control Official's (AAFCO/s) ingredient and labeling requirements for animal feed/pet food.

EAS offers on-site assessment services for pet food, animal feed and animal drug manufacturers and distributors. Our highly skilled independent consultants provide solutions to your CVM and AAFCO regulatory challenges, offering a seamless approach to submissions, development of Good Manufacturing Practices, evaluation of ingredients and labels, and more.

Choose EAS for:

- ✓ FSMA Preventive Controls
- ✓ AAFCO Requirement and Enforcement
- ✓ NADA and ANDA Pharma Submissions
- ✓ Ingredient Assessments
- ✓ GRAS and Food Additive Submissions
- ✓ Product Labeling and Claims
- ✓ Foreign Supplier Verification Program, to include FSVP to include Importer Requirements
- ✓ FSVP Qualified Individual
- ✓ Traceability and Recall Assessment
