

Nicotine Containing Product Testing Services

Solving Today's Challenges with Tomorrow's Innovations

Labstat is recognized as the world's leading nicotine-containing product testing laboratory specializing in analytical chemistry, in-vitro toxicology, microbiology and method development.

Labstat sets the industry standard for high-quality data sets, excellence in client services, and competitive report turnaround times. The breadth of our testing capabilities span across multiple nicotine product types:

Reduced Risk Products (RRPs)

- ✓ E-cigarettes and e-liquids
- ✓ Heat-not-burn (Tobacco heated products)
- ✓ Tobacco-Free Nicotine Pouches
- ✓ Nicotine gum and nicotine lozenges

Conventional Tobacco Products

- ✓ Cigarettes
- ✓ Cigars
- ✓ Smokeless tobacco
- ✓ Snus and tobacco

Labstat has the most extensive testing capabilities in the world supporting regulatory reporting, research and product development.

We test for all global regulatory testing requirements including:

- ✓ FDA Premarket Tobacco Product Applications (PMTA)
- ✓ FDA Harmful and Potentially Harmful Constituents (HPHCs)
- ✓ FDA Modified Risk Tobacco Product Applications (MRTP)
- ✓ FDA Substantial Equivalence
- ✓ Health Canada Reporting Regulations
- ✓ ANVISA (Brazil) Reporting Regulations
- ✓ EU Tobacco Products Directive (TPD)

In a highly regulated and research intense market, we have invested significantly in quality systems to ensure confidence in the results we produce. We are ISO 17025 accredited with over 200 methods on our scope of accreditation, OECD capable and 21 CFR Part 58 (GLP).
